

Calculating Match for RTP Applicants

Minimum Match Requirement (for all Applicants)

The minimum amount of match shown on an RTP application must be 20% of the total project cost (RTP request plus match), which is equal to 25% of the RTP Funding Request (see below). If desired, applicants may include match up to 5% above the minimum match requirement.

Use either formula to calculate your match requirement:

$$\text{Minimum Match} = (\text{RTP Funding Request} / 0.80) - \text{RTP Funding Request}$$

or

$$\text{Minimum Match} = \text{RTP Funding Request} \times 0.25$$

To check your math, enter your RTP request below and the form will calculate your match requirement.

Your Minimum Match Requirement:

Non-Federal Match Requirement (for Federal Applicants only)

In addition to meeting the requirement above, at least 5% of a federal entity's total project cost (RTP request plus total match) must be from a non-federal source.

Use the formula to calculate your non-federal match requirement:

$$\text{Minimum Non-Federal Match} = (\text{RTP Request} + \text{Federal Match}) / 19$$

To check your math, enter your RTP request and federal match amount below and the form will calculate your non-federal match requirement.
